

Stand magnifier F+C 8x

The stand magnifier F+C 8x

Our stand magnifier F+C 8x is the result of many customer requests. You don't always want to measure something - but you never want to do without the usual high quality of our magnifiers.

The stand magnifier F+C 8x is inclined and offers an excellent illumination of the object to be viewed without an additional light source due to the large light inlet. Due to the neutral glass plate, an object such as a stamp can be optimally fixed without damaging it. At the same time, the lens system is protected against dirt such as dust. Of course, the stand magnifier can also be focussed steplessly to offer you maximum comfort. The magnifier comes with a practical break-proof case so that you can enjoy your stand magnifier for as long as possible. In addition, you can order a reticle with a scale of your choice at any time and thus convert your stand magnifier simply and easily into a measuring magnifier.
